

WHAT IS NAD+?

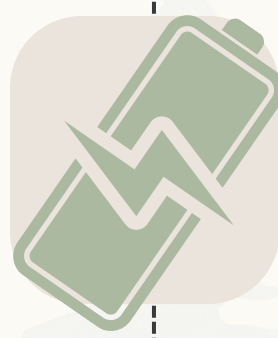

NICOTINAMIDE ADENINE DINUCLEOTIDE (NAD+)

NAD+ is a natural molecule that helps your cells turn nutrients into energy by **fueling** your body's cellular powerhouses — **mitochondria!**

REVITALIZE CELLS

NAD+ helps your cells make **energy**, **fix damage**, and stay strong so your body feels more clear, balanced, and energized

IV OR IM INJECTION

IV NAD+ goes straight into the bloodstream for **fast, powerful results**, while IM NAD+ is a quick shot with **slower, steady effects**. Both support energy, detox, and cell health — just at different speeds.

HELP IMPROVE SLEEP CYCLES

NAD+ helps balance your sleep cycle and boosts energy by supporting your body's natural rhythms.

AIDS IN ADDICTION RECOVERY

NAD+ helps bring back healthy levels of **serotonin** and **dopamine**, which improves mood and **reduces cravings**. It also helps the brain heal and detox during recovery.

CLEAR BRAIN FOG AND IMPROVE COGNITION

NAD+ gives your brain cells more energy and helps them work better. It can **clear brain fog**, **sharpen focus**, and **improve memory** by reducing inflammation and balancing brain chemicals.
